

Serial No. 09/778,096

IN THE CLAIMS:

1. to 4. (Canceled)

5. (Previously Presented) The decorative molding according to claim 12, wherein

a decorative layer is formed on a surface of the base sheet not coated with the bonding layer.

6. (Canceled)

7. (Currently Amended) The decorative molding according to claim 4 12, wherein

a primer layer is sandwiched between the decorative layer and the bonding layer.

8. (Previously Presented) The decorative molding according to claim 7, wherein

the primer layer contains either an acrylic resin or a polyvinyl chloride-acetate resin or both the acrylic resin and the polyvinyl chloride-acetate resin.

9. (Previously Presented) The decorative molding according to claim 12, wherein

the layer containing the acrylic-modified polyolefin resin is a decorative layer containing the acrylic-modified polyolefin resin as a binder.

10. (Previously Presented) The decorative molding according to claim 12, wherein

the base sheet is formed of an acrylic resin.

11. (Previously Presented) The decorative molding according to claim 12, wherein

the base sheet is a laminated sheet having at least two layers.

12. (Currently Amended) A decorative molding comprising:

a decorative sheet for in-mold decorating injection molding including a base sheet, and a resin layer formed on a surface of the base sheet containing an acrylic-modified polyolefin resin; and

an injection-molded resin molding to which the resin layer containing an acrylic-modified polyolefin resin composed by graft-copolymerizing at least an acrylic monomer and/or an acrylic prepolymer on principal chains of a polypropylene resin composed by graft-copolymerizing at least an acrylic monomer and/or an acrylic prepolymer on principal chains of a polypropylene resin is bonded, wherein

(1) said resin layer is a bonding layer capable of adhering to the injection-molded resin molding,

(2) a decorative layer is sandwiched between the base sheet and the bonding layer, and

(3) the decorative layer contains a binder resin, and at least either an acrylic resin or a polyvinyl chloride-acetate resin, or both the acrylic resin and the polyvinyl chloride-acetate in the binder resin.

13. (Original) The decorative molding according to claim 12, wherein

the injection-molded resin molding is formed of a polyolefin resin.
